

CALL FOR PAPERS

Innovations for a New Sustainable Blue Economy Increase Productivity/Economies While Respecting Cultures Around the World

Fall 2023

This special issue will cover innovative marine, coastal, and port technologies that support a sustainable new Blue Economy. Manuscripts in this issue will focus on the broad topics that demonstrate the possibility for scalability, a high level of innovation, and the ability of the founders to execute through to full commercialization. Some of the subject areas to be considered include:

- Improvements to offshore wind infrastructure
- Eliminating sources of eutrophication from land-based, agriculture-based sources
- Biodiversity monitoring and species identification using new methods, including eDNA
- Robotic systems to support offshore work and subsea work
- Sustainable port operations to support ocean transportation and goods movements
- Improved systems for aquaculture, including mariculture
- CO₂ sequestration and recycling
- Solutions to remove and destroy so-called forever chemicals from sensitive waterways

The *MTS Journal* is the flagship publication of the Marine Technology Society. It publishes the highest caliber, peer-reviewed papers on subjects of interest to the society: marine technology, ocean science, marine policy, and education.
